

**BOARD OF DIRECTORS**

Friday, October 27<sup>th</sup>, 2017

8:30 a.m. – 11:00 a.m.

Thomson Reuters  
610 Opperman Drive, Eagan, MN 55123

**AGENDA**

1. **Call to Order (Lisa Schlosser)** **8:30**
2. **Introductions (Lisa Schlosser)** **8:30 – 8:35**
3. **Approval of Meeting Minutes (Lisa Schlosser)** **8:35 – 8:40**
  - July 21<sup>st</sup>, 2017
4. **Financial Update (Ed Foppe)** **8:40 – 8:45**
5. **President’s Report (Margaret Anderson Kelliher)** **8:45 – 8:50**
  - Tekne Awards Update
  - \*enclosures – Presidents Report, Staff Report
6. **Spring Conference 2018 Committee Report (Jacquelyn Crowhurst, Jake Krings)** **8:50 – 9:00**
- 2017 ACE Presentations** **9:00 – 10:55**
  1. Expo 2023: Global Health & Wellness
  2. Accelerating the Vikings
  3. Expo 2023: Sharing the Experience
  4. DMC
  5. Expo 2023: Emerging Technology
  6. Vikings & STEM Ed
7. **Other Business (All)** **10:55 – 11:00**
8. **Adjourn** **11:00**

**Next MHTA Board Meeting:  
December 8<sup>th</sup>, 2017 8:30 – 11:00 a.m.  
Location: Unisys, 3199 Pilot Knob Road, St. Paul, MN 55121**

## Upcoming Events Listing

### Oct

27 MHTA BOD (ACE Presentations)

### Nov

10 MHTA Exec Committee

15 Tekne Awards

### Dec

6 CIO Panel

8 MHTA Board of Directors

13 FOUNDATION Board of Directors

15 MHTA Exec Committee

## SAVE THE DATE 2018

February 21 - Tech.2018

April 10 – Spring Conference

September 13 – Bids & Bytes

## Board of Directors Minutes

Vice Chair Scott Singer Presiding

8:30 am to 10:30 am

Friday, July 21<sup>st</sup>, 2017

PwC

45 South Seventh Street, Suite 3400, Minneapolis, MN 55402

**Present:** Margaret Anderson Kelliher, Doug Carnival, Jacquelyn Crowhurst, Amy Fisher, Ed Foppe, Win Giles, David Harkness, Todd Hauschildt, Patrick Joyce, Harlan Kragt, Jake Krings, Michael Lacey, Sandy Lee, Chuck Lefebve, Mac Lewis, Paul Mattia, Cy Morton, Samuel Prabhakar, Chris Rence, Pat Ryan, Scott Singer, Mike Sivo, Dee Thibodeau, Ken Voss **Absent:** Kevin Boeckenstedt, Jill Farrington, Win Giles, Milla Hautman, Jay Heath, Karen Hudson, Rick Krueger, Joy Lindsay, Tyler Middleton, David Minkinen, Lisa Schlosser, Kirsten Stone **Staff:** Claire Ayling, Tim Barrett, Patty Carruth, Ted Modrich, Lonni Ranallo, Andrew Wittenborg

### 1. Call to Order

Vice Chair Scott Singer called the meeting to order.

### 2. Introductions

### 3. Approval of May 19<sup>th</sup>, 2017 Meeting Minutes

Michael Lacey moved to approve the May 19<sup>th</sup> meeting minutes, Dee Thibodeau seconded the motion, the motion carried and the minutes were approved.

### 4. Governance

Michael Lacey presented a motion to nominate Bob Hirsch of Deloitte, and Sridhar Koneru of Xcel Energy to replace David Harkness to the MHTA Board of Directors. Harlan Kragt seconded the motion, the motion carried and Bob Hirsch and Sridhar Koneru are elected to the MHTA Board of Directors.

### 5. Financial Update

Ed Foppe gave the financial update. The 2016 Audit was completed in June by CliftonLarsonAllen (CLA). MHTA has received an unqualified opinion for 2016. CLA performed a number of tests and this year tested membership revenue to verify that revenue is being accurately portrayed in the accrual process. CLA also looked at some data analytics. The Executive Committee has finalized the audit. Ed reviewed the Form 990 and explained that this is a public document and encouraged the Board of Directors to review the mission and the form itself.

Ed Foppe made a motion to approve and file Form 990, Michael Lacy seconded the motion, the motion carried and the Form 990 is approved.

June financials are complete, with membership running behind plan by \$49K. All events are running to plan, although Spring income was behind, expenses also trailed, creating a favorable net income on that event. SciTech and SBIR, STEM programs all running close to

plan. Net income at \$165K vs budgeted net of \$227K. Scott Singer asked that a strategy be created to improve membership revenue. Discussion took place around membership and the membership procedures that are currently under review.

**6. Events Update**

Patty Carruth gave an events update. Event Committee's for Tekne, Tech. , and Spring Conference have begun meeting. The Minnesota Venture Conference sponsorship is running behind plan, and we have 13 of the 18 company presentations confirmed. We need more registration from the investor community. Tekne applications and nominations have begun, with sponsorship sales going well. We are working on more speakers for the CIO Panel.

**7. Membership**

Andrew Wittenborg gave a presentation of the membership engage campaign.

**8. Bids & Bytes Event**

Tim Barrett gave an overview of the Bids & Bytes event to support the MHTA Foundation that will happen on September 12<sup>th</sup> at Aria, downtown Minneapolis. Tim walked through sponsorship and bidding opportunities.

**9. Presidents Report**

Margaret Anderson Kelliher gave an update on general MHTA activity and an overview of the TECNA conference.

**10. Presentation: Minnesota Compass| Wilder Foundation**

Allison Liuzzi gave a presentation of the Minnesota Compass project focusing in on the STEM aspect of the research.

**11. Other Business**

**12. Adjourn**

Dee Thibodeau made a motion to adjourn, Ed Foppe seconded the motion, the motion carried and the meeting was adjourned.

### MHTA P&L vs Budget September 2017

|  | Jan - Sep 17  | YTD Budget    | Projected YE    | Annual Budget | \$ Over Budget  |
|--|---------------|---------------|-----------------|---------------|-----------------|
| <b>Total Membership</b>                    | 569,169       | 604,297       | 583,593         | 618,721       | (35,128)        |
| <b>Total Promotion / Events</b>            | 192,131       | 180,104       | 300,632         | 370,105       | (69,473)        |
| <b>Total Programs- STEM, Scitech, SBIR</b> | 305,777       | 320,784       | 397,805         | 412,813       | (15,008)        |
| <b>Sub Total</b>                           | 1,067,077     | 1,105,185     | 1,282,030       | 1,401,639     | (119,609)       |
| <b>Operate MHTA &amp; Public Policy</b>    | 1,029,057     | 1,055,790     | 1,365,659       | 1,392,393     | (26,734)        |
| <b>Net Income</b>                          | <b>38,020</b> | <b>49,395</b> | <b>(83,630)</b> | <b>9,246</b>  | <b>(92,876)</b> |

|   | Jan - Sep 17  | YTD Budget    | Projected YE    | Annual Budget | \$ Over Budget  |
|---|---------------|---------------|-----------------|---------------|-----------------|
| <b>Income</b>                                   |               |               |                 |               |                 |
| <b>Total Membership</b>                         | 569,169       | 604,297       | 583,593         | 618,721       | (35,128)        |
| <b>Total Promotion / Events</b>                 | 349,000       | 363,125       | 662,025         | 757,650       | (95,626)        |
| <b>Total STEM Programs</b>                      | 907,056       | 969,800       | 1,156,446       | 1,155,500     | 946             |
| <b>Total Other Income*Sales &amp; Marketing</b> | 13,754        | 15,572        | 13,782          | 15,600        | (1,818)         |
| <b>Total Income</b>                             | 1,838,978     | 1,952,794     | 2,415,845       | 2,547,471     | (131,626)       |
| <b>Expense</b>                                  |               |               |                 |               |                 |
| <b>5090 · Strategic Planning</b>                | 20,296        | 19,000        | 20,296          | 19,000        | 1,296           |
| <b>Total Administration</b>                     | 143,204       | 148,899       | 188,358         | 194,053       | (5,695)         |
| <b>Total 5000 · Association Staffing</b>        | 815,071       | 828,554       | 1,086,457       | 1,099,940     | (13,483)        |
| <b>Total 5400 · Sales &amp; Marketing</b>       | 29,740        | 40,410        | 38,330          | 49,000        | (10,670)        |
| <b>Total Promotion / Event Expenses</b>         | 156,869       | 183,021       | 361,393         | 387,545       | (26,152)        |
| <b>Total STEM Program expense</b>               | 601,279       | 649,016       | 758,641         | 742,687       | 15,954          |
| <b>Total Public Policy</b>                      | 34,500        | 34,500        | 46,000          | 46,000        | 0               |
| <b>Total Expense</b>                            | 1,800,958     | 1,903,399     | 2,499,475       | 2,538,225     | (38,750)        |
| <b>Net Income</b>                               | <b>38,020</b> | <b>49,395</b> | <b>(83,630)</b> | <b>9,246</b>  | <b>(92,876)</b> |

## Sponsorship Progress

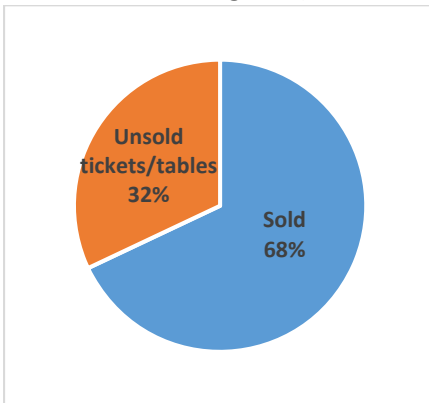

| Stage                    | Amount          |
|--------------------------|-----------------|
| Sold                     | \$ 90,000       |
| <b>Unsold</b>            | <b>\$ 5,000</b> |
| Tekne Sponsorship Budget | \$ 95,000       |

## Sponsors confirmed to date

| Organization    | Sponsorship        |
|-----------------|--------------------|
| Optum           | Presenting         |
| Thomson Reuters | Presenting         |
| Comcast         | Red Carpet         |
| AT&T            | Platinum           |
| Ecolab          | Platinum           |
| Robins Kaplan   | Finalist Reception |
| Genesis10       | VIP Reception      |
| Unisys          | Silver             |
| Computex        | Silver             |
| Medtronic       | Silver             |
| Digineer        | Silver             |
| Xcel            | Silver             |

## Tickets/Tables Progress (Excludes sponsor tables)

| Ticket/Table Revenue         | Amount           |
|------------------------------|------------------|
| Sold                         | \$ 67,830        |
| <b>Unsold tickets/tables</b> | <b>\$ 31,945</b> |
| Tekne Reg Budget             | \$ 99,775        |

# Gartner Top 10 Strategic Technology Trends for 2018

Intelligent, Digital, Mesh

# Intelligent

## Trend No. 1: AI Foundation

**2-5 years**

The ability to use [AI](#) to enhance decision making, reinvent business models and ecosystems, and remake the customer experience will drive the payoff for digital initiatives through 2025. Given the steady increase in inquiry calls, it's clear that interest is growing. A recent Gartner survey showed that 59% of organizations are still gathering information to build their **AI strategies**, while the remainder have already made progress in piloting or adopting AI solutions.

Although using AI correctly will result in a big digital business payoff, the promise (and pitfalls) of general AI where systems magically perform any intellectual task that a human can do and dynamically learn much as humans do is speculative at best. Narrow AI, consisting of highly scoped machine-learning solutions that target a specific task (such as understanding language or driving a vehicle in a controlled environment) with algorithms chosen that are optimized for that task, is where the action is today. "Enterprises should focus on business results enabled by applications that exploit narrow AI technologies and leave general AI to the researchers and science fiction writers," says Cearley.

## Trend No. 2: Intelligent Apps and Analytics

**2-5 years**

Over the next few years every app, application and service will incorporate AI at some level. AI will run unobtrusively in the background of many familiar application categories while giving rise to entirely new ones. AI has become the next major battleground in a wide range of software and service markets, including aspects of ERP. "Challenge your packaged software and service providers to outline how they'll be using AI to add business value in new versions in the form of advanced analytics, intelligent processes and advanced user experiences," notes Cearley.

Intelligent apps also create a new intelligent intermediary layer between people and systems and have the potential to transform the nature of work and the structure of the workplace, as seen in virtual customer assistants and enterprise advisors and assistants.

"Explore intelligent apps as a way of augmenting human activity, and not simply as a way of replacing people," says Cearley. Augmented [analytics](#) is a particularly strategic growing area that uses machine learning for automating data preparation, insight discovery and insight sharing for a broad range of business users, operational workers and citizen data scientists.

## Trend No. 3: Intelligent Things

**5-10 years**

Intelligent things use [AI](#) and machine learning to interact in a more intelligent way with people and surroundings. Some intelligent things wouldn't exist without AI, but others are existing things (i.e., a camera) that AI makes intelligent (i.e., a smart camera.) These things operate semi-autonomously or autonomously in an unsupervised environment for a set amount of time to complete a particular task. Examples include a self-directing vacuum or autonomous farming vehicle. As the technology develops, AI and machine learning will increasingly appear in a variety of objects ranging from smart healthcare equipment to autonomous harvesting robots for farms.

As intelligent things proliferate, expect a shift from stand-alone intelligent things to a swarm of collaborative intelligent things. In this model, multiple devices will work together, either independently or with human input. The leading edge of this area is being used by the military, which is studying the use of drone swarms to attack or defend military targets. It's evident in the consumer world in the opening example showcased at CES, the consumer electronics event.

# Digital

## **Trend No. 4: Digital Twins**

**5-10 years**

A digital twin is a digital representation of a real-world entity or system. In the context of IoT, [digital twins](#) are linked to real-world objects and offer information on the state of the counterparts, respond to changes, improve operations and add value. With an estimated 21 billion connected sensors and endpoints by 2020, digital twins will exist for billions of things in the near future. Potentially billions of dollars of savings in maintenance repair and operation (MRO) and optimized IoT asset performance are on the table, says Cearley. In the short term, digital twins offer help with asset management, but will eventually offer value in operational efficiency and insights into how products are used and how they can be improved.

Outside of the IoT, there is a growing potential to link digital twins to entities that are not simply “things.” “Over time, digital representations of virtually every aspect of our world will be connected dynamically with their real-world counterparts and with one another and infused with AI-based capabilities to enable advanced simulation, operation and analysis,” says Cearley. “City planners, digital marketers, healthcare professionals and industrial planners will all benefit from this long-term shift to the integrated digital twin world.” For example, future models of humans could offer biometric and medical data, and digital twins for entire cities will allow for advanced simulations.

## **Trend No. 5: Cloud to the Edge**

**5-10 years**

Edge computing describes a computing topology in which information processing and content collection and delivery are placed closer to the sources of this information. Connectivity and latency challenges, bandwidth constraints and greater functionality embedded at the edge favors distributed models. Enterprises should begin using edge design patterns in their infrastructure architectures — particularly for those with significant IoT elements. A good starting point could be using colocation and edge-specific networking capabilities.

While it’s common to assume that cloud and edge computing are competing approaches, it’s a fundamental misunderstanding of the concepts. Edge computing speaks to a computing topology that places content, computing and processing closer to the user/things or “edge” of the networking. [Cloud](#) is a system where technology services are delivered using internet technologies, but it does not dictate centralized or decentralized service delivering services. When implemented together, cloud is used to create the service-oriented model and edge computing offers a delivery style that allows for executions of disconnected aspects of cloud service.

## **Trend No. 6: Conversational Platforms**

**5-10 years**

Conversational platforms will drive a paradigm shift in which the burden of translating intent shifts from user to computer. These systems are capable of simple answers (How’s the weather?) or more complicated interactions (book a reservation at the Italian restaurant on Parker Ave.) These platforms will continue to evolve to even more complex actions, such as collecting oral testimony from crime witnesses and acting on that information by creating a sketch of the suspect’s face based on the testimony. The challenge that conversational platforms face is that users must communicate in a very structured way, and this is often a frustrating experience. A primary differentiator among conversational platforms will be the robustness of their conversational models and the API and event models used to access, invoke and orchestrate third-party services to deliver complex outcomes.

## **Trend No. 7: Immersive Experience**

**2-5 years**

[Augmented reality](#) (AR), virtual reality (VR) and mixed reality are changing the way that people perceive and interact with the digital world. Combined with conversational platforms, a fundamental shift in the user experience to an invisible and immersive experience will emerge. Application vendors, system software vendors and development platform vendors will all compete to deliver this model.

Over the next five years the focus will be on mixed reality, which is emerging as the immersive experience of choice, where the user interacts with digital and real-world objects while maintaining a presence in the physical world. Mixed reality exists along a spectrum and includes head-mounted displays (HMD) for AR or VR, as well as smartphone- and tablet-based AR. Given the ubiquity of mobile devices, Apple’s release of ARKit and iPhone X, Google’s Tango and ARCore, and the availability of cross-platform AR software development kits such as Wikitude, we expect the battles for smartphone-based AR and MR to heat up in 2018.

# Mesh

## **Trend No. 8: Blockchain**

**5-10 years**

[Blockchain](#) is a shared, distributed, decentralized and tokenized ledger that removes business friction by being independent of individual applications or participants. It allows untrusted parties to exchange commercial transactions. The technology holds the promise to change industries, and although the conversation often surrounds financial opportunities, blockchain has many potential applications in government, healthcare, content distribution, supply chain and more. However, many blockchain technologies are immature and unproven, and are largely unregulated.

A practical approach to blockchain demands a clear understanding of the business opportunity, the capabilities and limitations of blockchain, a trust architecture and the necessary implementation skills. Before embarking on a distributed-ledger project, ensure your team has the cryptographic skills to understand what is and isn't possible. Identify the integration points with existing infrastructures, and monitor the platform evolution and maturation. Use extreme caution when interacting with vendors, and ensure you are clearly identifying how the term "blockchain" is being used.

## **Trend No. 9: Event-Driven**

Digital businesses rely on the ability to sense and be ready to exploit new digital business moments. Business events reflect the discovery of notable states or state changes, such as completion of a purchase order. Some business events or combinations of events constitute business moments — a detected situation that calls for some specific business action. The most consequential business moments are those that have implications for multiple parties, such as separate applications, lines of business or partners.

With the advent of AI, the IoT, and other technologies, business events can be detected more quickly and analyzed in greater detail. Enterprises should embrace "event thinking" as part of a digital business strategy. By 2020, event-sourced, real-time situational awareness will be a required characteristic for 80% of digital business solutions, and 80% of new business ecosystems will require support for event processing.

## **Trend No. 10: Continuous Adaptive Risk and Trust**

Digital business creates a complex, evolving security environment. The use of increasingly sophisticated tools increases the threat potential. [Continuous adaptive risk and trust assessment](#) (CARTA) allows for real-time, risk and trust-based decision making with adaptive responses to security-enable digital business. Traditional security techniques using ownership and control rather than trust will not work in the digital world. Infrastructure and perimeter protection won't ensure accurate detection and can't protect against behind-the-perimeter insider attacks. This requires embracing people-centric security and empowering developers to take responsibility for security measures. Integrating security into your DevOps efforts to deliver a continuous "DevSecOps" process and exploring deception technologies (e.g., adaptive honeypots) to catch bad guys that have penetrated your network are two of the new techniques that should be explored to make CARTA a reality.

## 2018 Spring Conference Planning Survey

Based on Top 10 Gartner Technology Trends for 2018

|    | Technologies                       | Importance to YOUR company (rank EACH on a scale of 1-5; 1= most important, 5=least) | In priority order, choose the <u>five</u> (5) most relevant for the Spring Conference audience | Descriptions   | Sub Topic       | Examples  | Speaker recommendations |
|----|------------------------------------|--|--|--|-----------------|---|-------------------------|
| 1  | AI Foundation                      |  |  | The ability to use AI to enhance decision making, reinvent business models and ecosystems, and remake the customer experience.   | AI              | Elements of AI woven into corporate strategies.                         |                         |
| 2  | Intelligent Apps & Analytics       |  |  | Within AI, machine learning includes algorithms that are developed to tell a computer how to respond to something by example.  | Deep Learning   | IBM's Watson  |                         |
| 3  | Intelligent Things                 |  |  | Everyday objects that incorporate autonomous technology. In other words, intelligent things can respond to real world conditions automatically.  | IOT             | Autonomous vehicles, smart home. Swarm technology.                      |                         |
| 4  | Digital Twins                      |  |  | Digital twin refers to a digital replica of physical assets, processes and systems that can be used for various purposes. The digital representation provides both the <b>elements</b> and the <b>dynamics</b> of how an Internet of Things device operates and lives throughout its life cycle. | IOT             | Twin models to objects used for field failure prediction.               |                         |
| 5  | Cloud to the Edge                  |  |  | Edge computing refers to data processing power at the edge of a network instead of holding that processing power in a cloud or a central data warehouse.   | IOT             | Internet facing systems - smart routers.                                |                         |
| 6  | Conversational Platforms           |  |  | Platforms using conversational interfaces that can understand the natural language of human users and augment/replace traditional menu and click interfaces.   | Human Interface | Alexa, Siri, Echo   |                         |
| 7  | Immersive Experience               |  |  | Noting or relating to digital technology or images that actively engage one's senses and may create an altered mental state.   | Human Interface | Flight simulators; Virtual Reality; Immersive 3D training environments. |                         |
| 8  | Blockchain                         |  |  | An encrypted digital ledger in which transactions are recorded chronologically and publicly. It consists of concatenated blocks of transactions—allows competitors to share a digital ledger across a network of computers without need for a central authority.                                 | Security        | Crypto-currencies or supply chains                                      |                         |
| 9  | Event-Driven Model                 |  |  | Event-driven programming is a programming paradigm in which the flow of the program is determined by events such as user actions (mouse clicks, key presses), sensor outputs, or messages from other programs/threads  | IOT             | Smart systems. Upfront decision making without human interaction.       |                         |
| 10 | Continuous Adaptive Risk and Trust |  |  | In a CARTA system decisions must continuously adapt. Trust and risk must be dynamic, not static, and assessed continuously as interactions take place and additional context becomes available.  | Security        | Preempt Behavioral Firewall   |                         |

**MHTA President Report  
October 27, 2017**

**TEKNE AWARDS**

Thank you to board and executive committee members who served as Tekne judges last month. Finalists have been announced, and the awards ceremony is on November 15. Table sales are already underway — if you're interested in buying a table, email Patty at [pcarruth@mhta.org](mailto:pcarruth@mhta.org). A big thank you to our BOD committee, who is doing great work on attendance and sponsorship!

**INTERCITY LEADERSHIP VISIT**

Participated in the 16<sup>th</sup> annual InterCity Leadership Visit, which traveled to Pittsburgh this year. The Minneapolis and St. Paul Chambers of Commerce host the trip, which is limited to 95 local civic leaders. A major focus of the trip was on the Pittsburgh tech community including AI and self-driving vehicles. We also heard from many civic and educational leaders, Carnegie Mellon, University of Pittsburgh who shared with us how closely the higher education community and bus community work together to focus on high growth knowledge based companies.

**NEW GET-STEM WEBSITE LAUNCHED**

We have finished work on an updated website for getSTEM, and we're already seeing increased connections and ambassador sign ups. Thank you to Thomson Reuters for hosting the site and being a terrific partner on this for so many years!

**GOVERNOR'S BROADBAND TASK FORCE**

The task force continues to meet to work on the report, set to be released early next year.

**NORBERT ABAYISENGA IN ST. OLAF MAGAZINE**

Norbert, our SciTechsperience Student Outreach Coordinator, was recently featured in a great article in St. Olaf's magazine. You can find it here: [insert link here].

**MEDIA/SPEECHES/IMPACT**

Highlights include:

- Spoke to the College Board's Government Relations retreat on MHTA, SciTechsperience, Public Policy, and STEM Education. 30 people in attendance.
- Interview by the Associated Press on Minnesota's efforts to secure Amazon's second HQ - <http://www.startribune.com/minnesota-prepares-to-fight-for-amazon-s-2nd-headquarters/443065803/>
- Interviewed by Star Tribune on Amazon and 'restrained' approach to bid - <http://www.startribune.com/some-business-leaders-protest-restrained-approach-to-amazon-bid/444315103/>
- Participated in a panel discussion hosted by Fredrikson & Byron with Twin Cities WRISE (Women of Renewable Industries and Sustainable Energy). The bipartisan panel discussed women running for office.
- Participated in a networking event for Young Women's Initiative Cabinet, hosted by the Governor's office. Approximately 25 young women in attendance, and many Cabinet members of other civic leaders participated. Promoted SciTechsperience and other MHTA STEM programming.
- Interviewed by MPR on Minnesota immigration and workforce - <https://www.mprnews.org/story/2017/09/14/minnesota-immigrant-workforce>

- Interviewed by GoMN on Amazon HQ2 - <https://www.gomn.com/news/amazons-hq2-how-it-could-dramatically-transform-the-twin-cities-tech-scene>
- Interviewed by Worth Magazine on Minneapolis-St. Paul technology and region's up-and-coming sports tech scene - <http://www.worth.com/destinations-2017-minneapolis-st-paul/>

## MHTA STAFF REPORT

October 2017

### **New MEMBERSHIP** <http://www.mhta.org/about/members>

|                                |                  |
|--------------------------------|------------------|
| Paragon IT Pros                | MyFornulary LLC  |
| Careerwave, Inc.               | AcuMedical Inc.  |
| Minnesota Cable Communications | DD Innovations   |
| Aliqon Consulting              | General Atlantic |

### **OUTREACH & EVENTS**

**ACE:** The ACE Leadership Program consists of 27 participants and six small groups. The final presentations to the Board will be on October 27<sup>th</sup> at Thomson Reuters.

**CIO Forums:** The next CIO Forum will be on November 2nd at Thrivent Financial.

The topic is SAAS: Pros & Cons!

Speakers from Thrivent Financial, Hazelden Betty Ford Foundation, and Hallmark  
 Sponsor is Improving – Twin Cities

The 2018 planning lunch is scheduled for December 1st.

**WLIT:** The next WLIT event is on Oct 24 at The Metropolitan Ballroom. 249 registrants to date.

Topic is *Influencing Across the Organization: Building Strategic Partnerships with the Business*

**MINNESOTA VENTURE CONFERENCE:** Takes place on Oct 25 at the Minneapolis Convention Center. 209 registrants to date.

Keynote addresses: Gene Munster, Loup Ventures and Andrew Downey, PwC

Startup Success Stories Panel includes Calabrio, Rebiotix, LeadPages and Bright Health

Breakout session panels by industry:

- Healthcare, Technology, Retail/Consumer and Food

Presenting Companies (Entrepreneurs): 18 of 18 spots are committed (including MNCup winner – MicroOptix)

Showcase Companies (1 minute pitch): 21 entrepreneurs committed

Sponsors to date: DEED, Calabrio, Greater MSP, PwC and Peak10/ViaWest

**TEKNE AWARDS:** Takes place on Nov 15 at the Minneapolis Convention Center.

57 Tables to date, including sponsors, judges, scholars, staff & crew

Emcee will be Paul Douglas.

12 Sponsors to date plus trade sponsors.

## **WORKFORCE DEVELOPMENT** [www.mhta.org/educate/](http://www.mhta.org/educate/); [www.mhta.org/work/](http://www.mhta.org/work/)

### **Bid & Bytes Benefit**

The Bids & Byte Benefit was held Tuesday, September 12, 2017. The event raised \$38,905 dollars for the Foundation's STEM programming. A full slate of unique auction experiences offered by leading C-level Technology executives were auctioned. Three non-profit partners offered exciting social hour activities/competitions. Past & current scholarship winners, Foundation volunteers, and other stakeholders participated as well.

### **STEM Scholarships**

The 2017 STEM Scholarship final selections were made in July. 2017 Award winners have been notified and will be invited to attend the Bids & Bytes Benefit in September and the [Tekne Awards in November](#).

### **The SciTechsperience Internship Program**

- The new program year began on September 1. We've already got 10 students placed (2 more than last year at this time). The 2018 budget is in the final planning stages, but we anticipate placing about 340 students this year. So, only 330 to go!
- Staff have been attending multiple student and employer recruiting events since September 1, sometimes more than one per day, including several during Twin Cities Start-Up week.
- SciTechsperience is teaming up with MN-SBIR and other agencies/programs to present Minnesota Resources for Science & Technologies Companies on November 2, 7:30 AM – 11:00 AM. \$15 gets attendees a networking breakfast, reverse pitches from the resource teams to entrepreneurs, a panel of employers who have used the resources, and info tables. Registration is open on [mhta.org](http://mhta.org).
- We are in the interview stage for the new Communications & Marketing Specialist position. We had a strong response to the posting and are moving forward with two great candidates. More come on this in the next few weeks.
- Work will begin soon on the 2017 Program Year Report, which will incorporate recruitment and placement stats, photos, quotes, and survey results.

### **MN-SBIR** [www.mhta.org/mn-sbir/](http://www.mhta.org/mn-sbir/)

MN-SBIR is the State's focal point to seed, early stage, emerging and existing firms to access federal research and development funding to support innovation, investment and commercialization of technologies.

- *Received \$10,000 commitment from the University of Minnesota, Office of Technology Commercialization*
- *Submitted final reports to the Small Business Administration and the Minnesota Department of Employment and Economic Development*
- MN CUP Semi-Finalists (MN SBIR clients)
  - Sironix Renewables was named the division winner in the Energy/Clean Tech/Water category. Sironix Renewables is a seed-stage company developing environmentally friendly and safe chemicals from plants to be used for industrial consumer products.
  - Chromatic 3D Materials was named the runner-up in the General category. Chromatic 3D Materials is inventing the next generation of 3D printing materials with the durability to meet the requirements for finished manufactured goods.(SciTechsperience company)

- o UR TURN was named runner-up in Impact Ventures category. UR TURN's smart-advisor technology is designed to keep students in the driver's seat, charting a path for success in school and beyond.

**Outreach and Education**

| Location  | Date      | Attendees |
|-----------|-----------|-----------|
| St. Cloud | 9/7/2017  | 5         |
| Mankato   | 9/13/2017 | Canx      |
| Rochester | 9/20/2017 | 2         |

**Coaching and Mentoring:**

Delivered coaching and mentoring via email and face-to-face meetings to the following demographics.

|                    |    |
|--------------------|----|
| Women-Owned        | 14 |
| Minority-Owned     | 14 |
| Minority/Women     | 2  |
| Small Business     | 63 |
| U of M/Mayo Clinic | 5  |

**Proposal and Award Activity:**

**October 5, 2017 Proposal Submissions; Award selections by March/April 2018**

|      |      |         |  |           |
|------|------|---------|--|-----------|
| USDA | SBIR | Phase I | Floating Gate Transistor Biosensors for Enhanced Food Safety (U of M Spinoff)                                      | \$100,000 |
| USDA | SBIR | Phase I | Evaluating the Efficacy of CD3 Watercraft Cleaning Stations in Promoting Cleaning, Draining and Drying in Boaters" | \$100,000 |
| USDA | SBIR | Phase I | Novel Bioreactor Media Experiments to Enhance Microbial Denitrification  | \$100,000 |
| USDA | SBIR | Phase I | Vertical Growing System using Season Extending Technology, Temperature Control and Soil Based Substrates           | \$100,000 |

**Funded:**

|      |            |     |  |             |
|------|------------|-----|--|-------------|
| SBIR | Phase I    | NIH | Next Generation Functional Neuroimaging (NGFN) Feasibility                       | \$238,517   |
| STTR | Phase I    | NIH | Self-Crosslinkable Hydrogel As An Embolic Agent For Traumatic Hemorrhage Control | \$225,000   |
| STTR | FAST Track | NIH | Intravesical Oncolytic Therapy for Bladder Cancer                                | \$156,755   |
| SBIR | Phase II   | DOD | Topical Therapeutic for Ocular Trauma  | \$1,000,000 |

## **PUBLIC POLICY** {[www.mhta.org/advocate](http://www.mhta.org/advocate)}

John will be convening the Government Relations Committee in October to begin planning for the 2018 Legislative Session. We are also engaged with the Dayton Administration, Greater MSP, and other stakeholders in putting together a proposal to attract Amazon's second headquarters (HQ2), and will be submitting a letter of support to encourage Amazon to locate HQ2 in Minnesota. Additionally, we will be convening a group of key state lawmakers and member organizations to discuss cybersecurity issues.

## **COMMUNICATIONS**

We are continuing to actively promote the Minnesota Venture Conference and Tekne Awards. We have promotional calendars, press kits, and partner resource pages for our major events. We also have media partnerships confirmed for both the Minnesota Venture Conference and Tekne Awards.

Recent media coverage has been strong with stories on the Venture Conference, Tekne Awards, and efforts to bring Amazon's HQ2 to Minnesota.

Our social media presence continues to grow. MHTA's Twitter account gained 47 followers in September and 19 so far in October, putting the total number of followers at 3,936. Our LinkedIn page gained 27 followers in September, and another 13 so far in October, up to a total of 1,853.

## **OPERATIONS & FINANCIAL**

Year to date financials through September are complete. Net income is \$38K vs budgeted net income of \$49K. Membership income has caught up slightly, and is currently off plan by \$35K. Overall event income is running close to plan, however we are projecting the CIO Forums to come in under plan by \$7,500 and the Venture conference to be under by \$80K, which is mainly made up of unfulfilled sponsorship revenue. Scitech and SBIR programs running to plan, as well as most categories of expenses.

The FAST Grant was awarded for the SBIR/STTR program at the end of August for the Federal fiscal year of Sept 30<sup>th</sup>, 2017 – Sept 29<sup>th</sup> 2018.

The SciTechsperience program has been awarded funding for the 2017-2019 state fiscal year at 2.565m. These program funds will be used during the 2018-2020 MHTA budget cycle and include 1.67M of matching funds for internships.
